PRAEFATIO.

Grammaticae Celticae librum praeclarum, sed minus habilem propter argumenti et voluminis amplitudinem indice uberiore aliquanto aptiorem ad usum reddi posse monuit nos ante hos tres annos Ernestus Windisch, vir doctissimus, praeceptor carissimus. Protinus igitur aggressi ad indicem componendum earum partium, quae ad hibernicam linguam spectant, postea vero variis occupationibus distenti nunc demum opusculum diu incohatum perpetravimus. Bipertitus est libellus. In altero capite quantum vetustiorum glossarum Grammaticae inseruerunt auctores, codicum foliorumque ordinem secuti composuimus, in altero singula vocabula enumeravimus, quorum de forma vel significatione illi disputaverunt. Ut primam illam partem conscriberemus etsi ex parte id nos adduxerat, quod tunc major pars librorum manu scriptorum, quibus glossae illae continentur, typis nondum erat expressa, tamen ea ne nunc quidem, cum illa ratio jam non valeret, omittenda esse videbatur, quippe ex qua perspici liceret, quantum reliquiarum illarum priscae linguae hibernicae ad construendam Grammaticam adhibitum esset, quantum neglectum. Simul eam commentarioli vice tironibus in studiis hujus linguae adjumento fore existimavimus. Numerorum notae glossis additae paginas indicant, in quibus singulae voces tractatae sunt, ex his *inclinatae* eas, in quibus glossa integra posita est sive amplioris glossae majus membrum, uncis inclusae eas, in quibus non plane eadem quae in codice extat vocabuli forma laudata est; *a* et *b* litterae numeris appositae partem superiorem et inferiorem cujusque paginae notant. Zeussii vel Ebelii errata corrigere in hac prima libelli parte supervacaneum erat codicibus illis jam paene omnibus vulgatis. Sed in altera varias

lectiones, quae alicujus momenti esse videbantur, quam diligentissime annotavimus. Vocabula inter se jungenda, ne nimia conjectura uteremur, ubi fieri potuit sub probata aliqua forma congregavimus. Quod attinet ad ordinem alphabeticum, notam *œ* (ab *ae* diphthongo distinguendam) ab *e* simplice non diversam habuimus.

Ernesto Windisch v. d. correcturae admodum molestae socio maximas habemus gratias.
